County of San Luis Obispo

TO: Board of Supervisors

FROM: Administrative Office / Lisa Howe/ 781-5011

DATE: 10/20/2015

SUBJECT: Thirty-day update on current drought conditions and related management actions for the Board's review of the continuing need for the March 11, 2014 proclamation of local emergency pursuant to Government Code section 8630. All Districts.

RECOMMENDATION

It is recommended that the Board receive the thirty-day update on current drought conditions and related management actions establishing the need to continue the proclamation of local emergency due to drought conditions in San Luis Obispo County.

DISCUSSION

Background

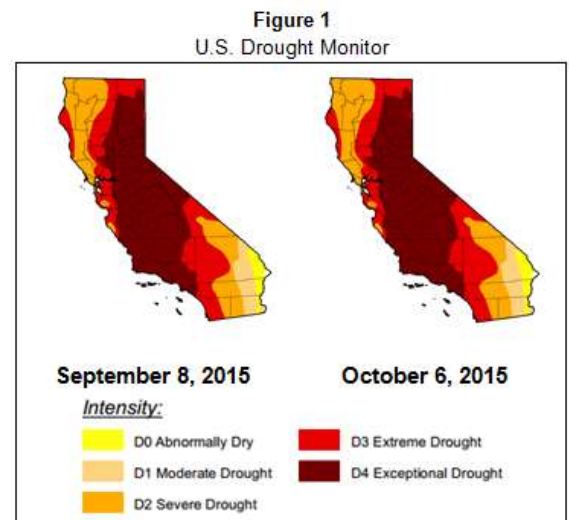

On March 11, 2014, the Board adopted a resolution proclaiming a local emergency due to drought conditions in San Luis Obispo County. Section 8630 of the California Government Code and County Code Chapter 2.80.070 (2) require that the Board of Supervisors review the need for continuing the local emergency at least every 30 days until such emergency is terminated. The Board also directed staff to return every 30 days to provide an update on the status of actions by the Drought Task Force, including a report on the analysis regarding local water conditions, local responses, conservation and outreach projects, and the State Water Project.

The last drought update was on September 22, 2015. Previous thirty-day updates are available at the following link:
http://www.slocounty.ca.gov/admin/Drought_Update/County_Drought_Updates.htm

The Drought Task Force continues to meet regularly to coordinate drought monitoring, impact assessments, responses to emergency health and safety, and public communication and outreach. The Drought Task Force prepared the Monthly Drought Update (Attachment 1) to inform the Board on current drought conditions and related management actions. Current drought conditions confirm the need to continue the proclamation of a local emergency.

Current Conditions

Much of the state remains in a severe drought or worse. The latest U.S. Drought Monitor report released October 8, 2015, indicates San Luis Obispo County remains at the D4 – Exceptional Drought intensity rating (Attachment 2). Approximately 92% of California is at a level D2 Severe Drought or worse with 46% of the state at a D4 intensity level. Figure 1 shows little change in the intensity levels throughout the state over the past month.

See Attachment 3 for county rainfall totals for the 2015-16 water year (July 2015 – June 2016). Reservoir levels remain significantly lower than the average percentage capacity for this time of year including: Nacimiento 20% (76,625 acre

feet); Whale Rock 38% (14,736 acre feet); Lopez 31% (15,442 acre feet); and Salinas 13% (3,215 acre feet) of capacity (Attachment 4).

Outlook

An El Niño (ENSO) Advisory continues in effect, with the October 8, 2015 ENSO Diagnostic Discussion indicating a 95 percent chance of strong even through winter with gradual weakening into spring 2016. The U.S. Seasonal Drought Outlook is calling for the drought to persist or intensify throughout California but slightly improve in southern California and on the Central Coast if El Niño delivers rain as predicted.

Impacts

Agricultural Conditions

Conditions within the agriculture industry fundamentally remain unchanged since the last update. Effects of continued drought on various commodities will not be fully understood until harvest is completed. Many producers are concerned with potential impacts from either a continuation of the drought or conversely, above average rainfall. Efforts to capture and store precipitation as well as to protect soils from potential erosion are being encouraged by University of California Farm Advisors as well as local Resource Conservation Districts.

Fire Conditions

Fire hazards will continue to increase through the fire season. In 2015, CAL FIRE has responded to over 7,187 fires across the State, burning 766,974 acres in State Responsibility Area. As previously reported, CAL FIRE San Luis Obispo has suspend all burning permits and open fires within the State Responsibility Area and within the Local Responsibility Area under contract with CAL FIRE. The Countywide Burn Ban will remain in effect until there is enough precipitation to reduce the fire threat. The burn ban eliminates all burning within CAL FIRE jurisdiction except for campfires at approved campgrounds. Locally, CAL FIRE is fully staffed, including 12 wildland engines, and 24/7 staffing of hand crews and dozers. Paso Robles Air Attack Base is staffed with three tankers and one air attack. Defensible Space Inspectors (DSI) have conducted over 9,000 inspections countywide including over 4,000 focused inspections in Cambria involving handing out fire prevention education materials door-to-door to all residences. A portable RAWS (CAL FIRE 511) was deployed in Cambria to augment fire weather monitoring capabilities on the north coast.

The County is continuing to work to streamline hazard tree permitting requirements in Cambria to facilitate tree removal on the high number of affected parcels. The County Planning and Building Department approved an emergency hazard tree removal permit allowing Cambria residents to remove dead hazardous trees with a non-cost permit. The County Planning Director sent a letter to residents authorizing them to remove hazard trees under certain conditions which include contacting the Fire Department and having an inspection done and their trees marked by CAL FIRE. The Cambria Community Services District was also issued an Emergency Permit for removal of up to 300 dead trees on District property.

Dry Well Reports

As the County enters the fourth consecutive summer of drought, the Drought Task Force continues to monitor and identify communities and local water systems in danger of running out of water.

The Governor's Drought Task Force created an online intake form for local, state, or tribal and federal agencies to document domestic water issues. The information is intended to inform and coordinate state response and mitigate drought impacts. Recently, in order to improve and streamline data collection and reporting, the Department of Water Resources has created a new integrated data system (see the Dry Well Reports section below under State & Federal Key Action Items from Last Month). Both agencies and individuals can complete the reporting form. Individuals with domestic water issues are encouraged to contact County Environmental Health at (805) 781-5544 or visit the state online reporting website at <https://mydrywatersupply.water.ca.gov/report/>.

Economic Conditions

The Labor and Workforce Development Agency (LWDA) and the Employment Development Department (EDD) introduced a new, streamlined survey to report drought-related job impacts. Collecting "real-time" drought-related information is essential for the LWDA and the Governor's Drought Relief Task Force to identify the drought's impact on California's industries, employers, and workers. A link to the new survey is available on the San Luis Obispo Workforce Development Board's website: www.SLOWorkforce.com. Though the WIB is hearing that there are impacts, the county does not have any "reportable" impacts due to the State's requirements for reporting (i.e. specific business name, address, etc.).

The County continues to identify assistance programs to help rural communities, businesses and individuals impacted by California's ongoing drought conditions. Information regarding drought assistance for rural homeowners has been placed on the County Drought Conditions and Water Conservation webpage. Rural Development, an agency of the United States Department of Agriculture (USDA), delivers a number of programs to help rural communities, businesses and individuals impacted by California's ongoing drought conditions.

Emergency Response Planning

County Office of Emergency Services

The County of San Luis Obispo Office of Emergency Services (OES) continues to coordinate with the Governor's Office of Emergency Services (Cal OES) to provide updates on the drought situation, respond to specific information requests to Cal OES, and coordinate local emergency needs. In addition, County OES continues to gather local situation status information and drought costs throughout the county in order to send the information to Cal OES.

Contingency Planning

The Public Health Department, the Public Works Department, and CAL FIRE/County Fire continue to develop plans to ensure there is adequate supply of water for firefighting and domestic water use in the event that a community does not have enough water. Water availability information from public water systems has been categorized into three categories; Watch, Vulnerable, and Critical. The information has been placed into a GIS mapping layer for contingency planning. These maps are available on all the County Fire Departments mobile data computers. During a fire, the fire commanders can use these maps to identify which water sources are reliable and draw down systems that are vulnerable.

Emergency Actions

The proclamation continues to provide authority for unforeseen needed actions. As also noted, proclamation provides a statement to State and Federal agencies of the seriousness of the County's situation.

The County has taken no new emergency actions specific to the drought in this reporting period.

Recommendation

Staff recommends that the Board review and receive the attached update. The update highlights the existence of continuing drought conditions in San Luis Obispo County. Review of this update by the Board fulfills the Board's duty to review the need to continue the proclamation of a local emergency due to the existence of drought conditions pursuant to Government Code section 8630. No other Board action is necessary.

Note: Any regulations issued because of the local drought emergency would be subject to Board approval. The local emergency proclamation adopted by the Board on March 11, 2014, will remain in effect until terminated by your Board.

OTHER AGENCY INVOLVEMENT/IMPACT

At the onset of the Governor's declaration and under the direction of the County Administrative Officer, a County Drought Task Force was formed. The Drought Task Force is comprised of multiple County departments, including: the Administrative Office, Office of Emergency Services, Public Works Department, General Services, County Parks and Recreation, County Fire (CAL FIRE), Agricultural Commissioner, Planning and Building, Farm Advisor, Health Agency, County Counsel, and First District Supervisor Frank Mecham. All member departments provided input for this report.

County OES continues to be in regular contact with Cal OES to receive and provide situation status information.

The Public Works Department continues to coordinate with local water purveyors and cities.

Public Health is coordinating with relevant State agencies, including the State California Department of Public Health and Emergency Medical Services Authority Health Coordination Center.

FINANCIAL CONSIDERATIONS

The long-term financial impact on the local economy, including the demand on County and other legal agency services, cannot be forecast at this time. The County continues to track drought-related costs. As of September 10, 2015, tracked labor costs associated with the drought total \$366,832.

RESULTS

Accepting the update prepared by the Drought Task Force, which establishes the existence of conditions of drought, confirms the need to continue the proclamation of a local emergency. Maintaining the proclamation of local emergency will continue to allow for the Public Works Department and other agencies to take immediate actions needed by allowing temporary reduction of certain regulatory and purchasing requirements. This will also permit County staff to assist in drought-related work and tasks outside their normal scope of duties in the capacity of Disaster Service Workers under Government Code section 3100. In addition, acceptance of the update from the Drought Task Force confirms the continuing existence of severe drought conditions and will also serve as notice to the State of our dire conditions and a reminder to all of the serious drought conditions facing the County and State.
